

# LEADING TECHNOLOGIES

Global Intelligent Solutions

Committed to Technology Empowering

**LEADINGTECH**  
Global Intelligent Solutions

# AIMS

- ▶ **User-based design and development**
- ▶ **Technology oriented solutions**
- ▶ **Empower individual/industry marketing goals**
- ▶ **High Spec deliverables**

# Mission and Vision

## Mission

We offer technology based solutions that are creative, innovative, intelligent and profitable, which meet the evolution and consolidation expectations of our clients, this by means of a solid articulation of the design, development, training and maintenance processes that add value to their bussiness market.

## Vision

We are a company committed to evolve alongside the dynamic advance of technology to support the digital society demands, which make us as a reference in the national market and a global leader in the provision of innovative and intelligent solutions for the ICT field.

# TEAM

Fernando Martínez Reyes  
PhD. Computer Science  
Nottingham University

Interest on mobile computing, pervasive sensing, domotics, and human-computer interactions

Raymundo Cornejo García  
PhD. Computer Science  
Centro de Investigación Científica y de Educación Superior en Ensenada  
Posdoc Fellowship, Northwestern University

Interest on human-computer interactions, user-based design, user experience, technologies for assisted living

Luis Carlos González Gurrola  
PhD. Computer Science  
University of North Carolina at Charlotte, USA  
Owns a Google Research Award

Interest on machine learning, evolutive computing, data minning and processes optimization

Adrián Alarcón Osollo  
Master in Information Technologies for Human-Computer Interaction  
Instituto Tecnológico de Monterrey

IT Architect, IBM México (2004 - 2017)

Interest on mobile, web and cloud environments, user experience, HCI

**LEADINGTECH**  
Global Intelligent Solutions

# The Client at the Hearth of our Solutions

- ▶ Development of digital solutions that meet client expectations
- ▶ We are using emerging technologies to develop competitive solutions
- ▶ Machine learning is always part of our design philosophy
- ▶ We create high value high quality information systems
- ▶ We acknowledge the importance to empower novel business ideas and the economy relevance to help consolidate mature industry
- ▶ There is not barrier for coding we do it for desktop, mobile, cloud, or embedded architectures
- ▶ We are promoters for the development of the digital society
- ▶
- ▶ Our promise to clients
- ▶ Deliver high quality solutions on time
- ▶ Create creative and profitable developments
- ▶ Our expertise is oriented to improve client processes
- ▶ The client needs are our need and we walk together to complete the goals

# TEAM SKILLS

- ▶ Design and creation of low/high fidelity prototyping
- ▶ Design an evaluation of user experience
- ▶ Development of mobile computing applications
- ▶ Development of Web/Cloud based solutions
- ▶ Development of desktop software
- ▶ Analysis and extraction of semantic data
- ▶ Embedded systems programming
- ▶ Design and development of user interfaces
- ▶ Design and integration of sensing oriented solutions
- ▶ Machine learning for data mining, forecasting and processes optimization

Android  
Angular

Node.js  
HTML5

Unity  
Apache

Wamp/Xampp  
PHP  
iOS  
X3D

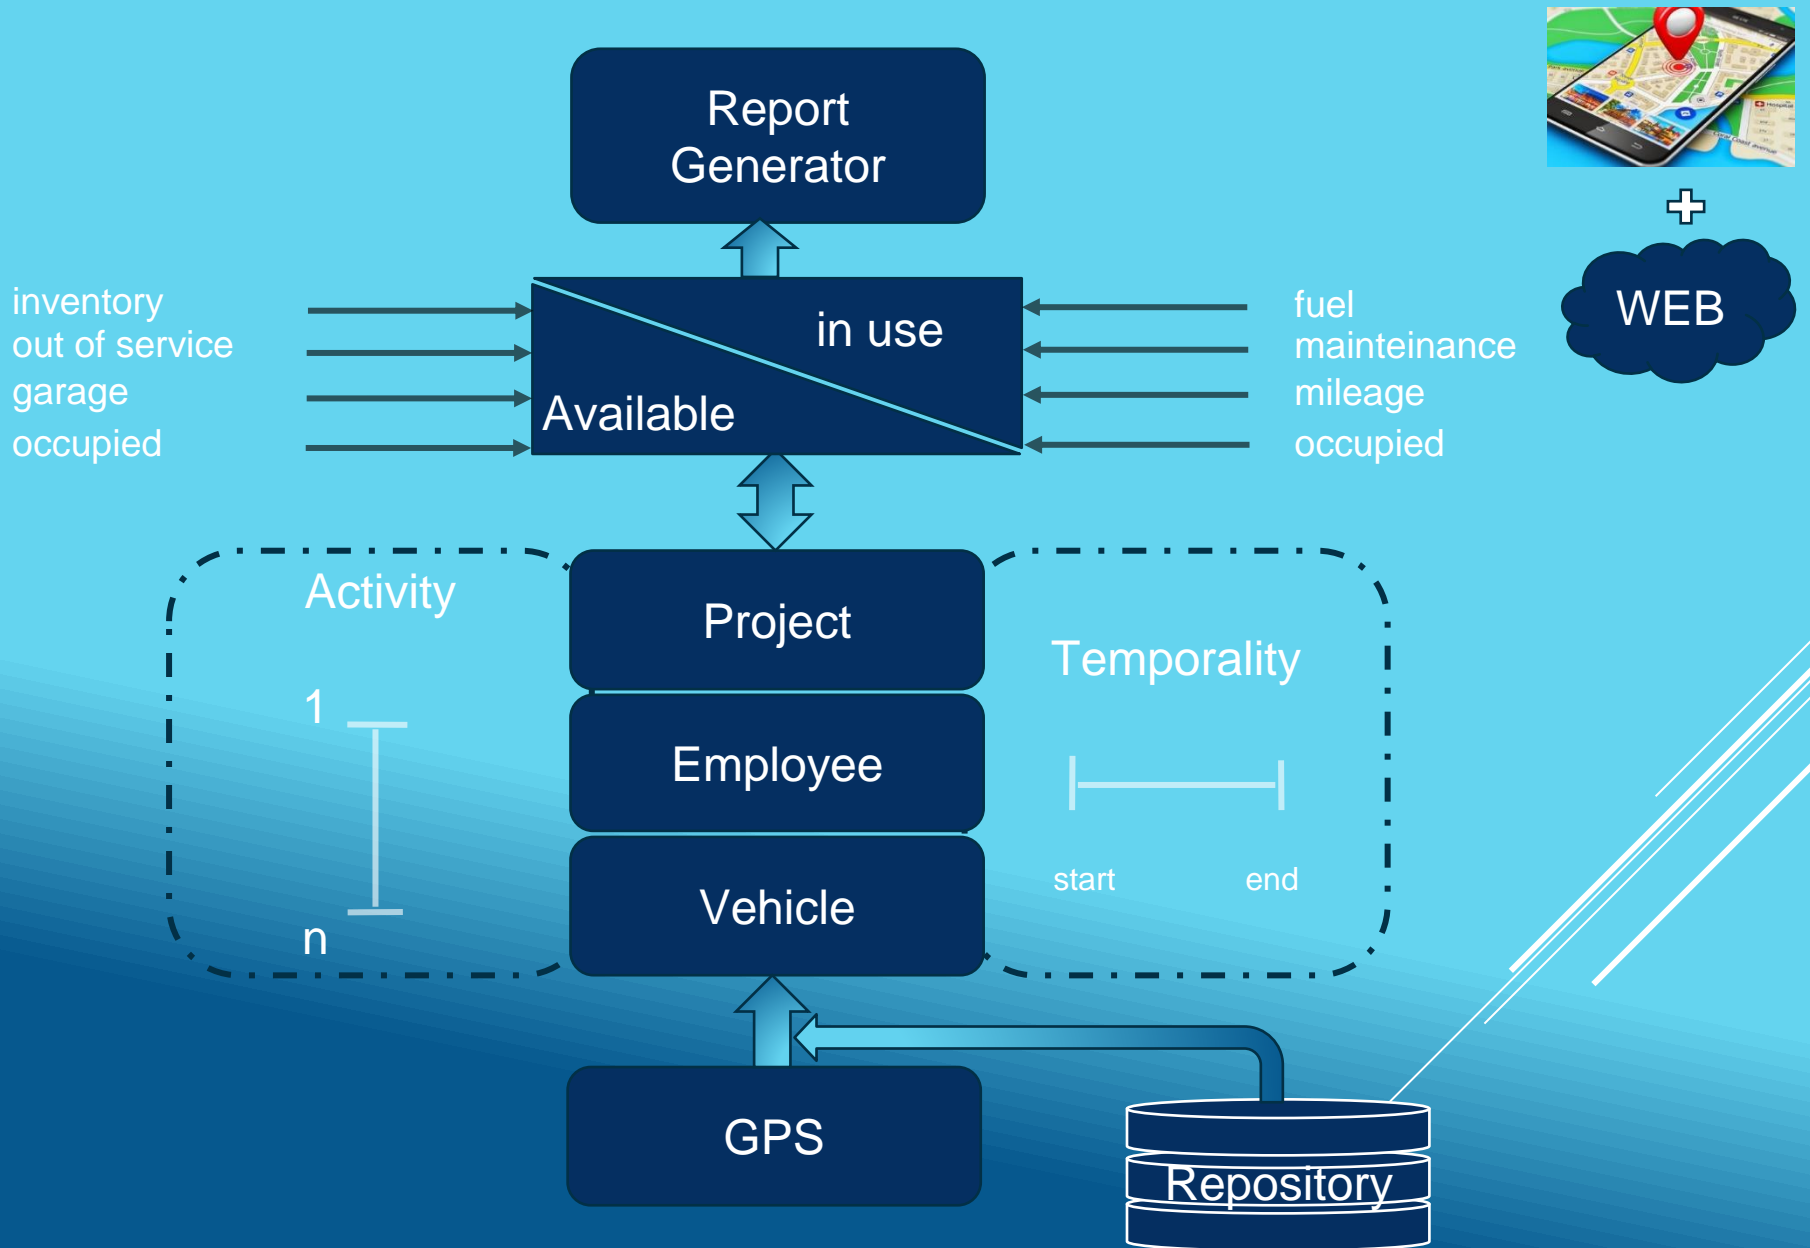

Java  
C, C++, C#  
MySQL  
GlassFish  
Python

# CURRENT DEVELOPMENT AREAS

- ▶ **Urban Mobility**
- ▶ **ERP-based software development**
- ▶ **Web/Cloud environments**

# MOBILITY BASED PROJECT MANAGEMENT
